

# NON-RESORBABLE MEMBRANES

## THE ORIGINAL, PATENTED, HIGH-DENSITY PTFE MEMBRANE

- Non-resorbable - won't resorb prematurely, clinician dictates healing time
- 100% Dense (non-expanded) PTFE; pore size less than 0.3  $\mu\text{m}$  - impervious to bacteria
- Purposely leave the membrane exposed - less surgical time, preservation of soft tissue architecture and keratinized mucosa
- Soft tissue attached, but doesn't grow through the membrane - exposed membrane allows for non-surgical removal
- Hexagonal dimples increase surface area - textures surface helps prevent retraction

The patented Regentex™ surface helps stabilize the membrane, and the soft tissue flap.
