20mm x 30mm
Membranes per box: 2

RTM3040

\$315
30mm x 40mm
Membranes per box: 2

- Resorbable; eliminates second surgery
- Highly cross-linked and stable structure exhibits unusually high tensile strength
- Safe; manufactured from highly purified Type 1 bovine Achilles tendon
- Layered construction allows cellular ingrowth of outer layer, but inner layers help prevent cellular and bacterial downgrowth
- Longer predictable resorption time of 26 to 38 weeks
- Guides healing of bone and surrounding tissue
- High mechanical strength for membrane stabilization using either sutures or bone screw tacks
- Excellent handling when wet, and either side can be placed against the site
- Optimized flexibility and rigidity for better maintenance of space
